SKYTRON

HERMES/TABLES - VOICE ACTIVATION REMOTE CONTROL

US entela® C Certified

Skytron's Digital Interface Kit permits CPU control through voice or touch screen commands provided by leading endoscopic equipment suppliers. The interface provides full function control of the surgical table by replicating the table remote pendant control.

HERMES™ Kits are offered for new table purchases or upgrades to existing tables. Kits include a driver (software), a 50 ft. cable, relay box, wiring harness, Operator's Manual and mounting hardware.

Voice or touch screen commands will control the full range of table functions, Trendelenburg, Rev. Trendelenburg, Lateral Tilt Elevation, Back, Leg, Kidney Bridge and Level/Return.

Connenction to HERMES™ voice activation system is accomplished via the supplied 50 ft. USB cable.

Interface Kits are available for the following Skytron surgical tables: 6002, 6002B, 6500N, 6500NB, 6500HD, 6600, 6600HD, 3500, and 3500B.

	Kit#
3500	**400-0424**
3500B	**400-0426**
6600	**400-0427**
6600B	**400-0428**
6002	**400-0429**
6002B	**400-0430**
6500N	**400-0431**
